TRANSFORMS WORK
TO WONDERMENT

A tuxedo is not for every day. The best china is reserved for special occasions only. And with the new SATAjet® 5000 B PHASER™, it is not for the average. It is made for those special moments.

An exclusive spray gun that has been developed in co-operation with the Porsche Design Studio. Exceptional optics, exceptional materials and an exceptional design concept – for exceptional projects.

Combining a unique look with high-quality materials and sophisticated technical solutions unusual for a piece of spray equipment, the PHASER™ offers a whole new view on spray gun design.

Technologically, the PHASER™ is identical to the SATAjet® 5000 B premium spray gun – utilising the same nozzle concept, it also has all other proven technical features which already define the SATAjet® 5000 B series as an outstanding spray gun.

The PHASER™ – the perfect equipment for the exceptional moments.
