

# 5S Workplace Organisation

One of the cornerstones of any 'Lean' initiative, '5S Workplace Organisation' actually interlinks with everything that happens in a collision repair environment. Indeed, it's one of the first critical steps to improvement and lays the foundation on which to build a productive and profitable business.

While tackling the implementation of 5S methodology can appear daunting, the MVP Business Solutions team is on-hand to provide expert support and guidance every step of the way.

It's called 5S because it consists of five key points that each start with 'S':

- Sort
- Simplify
- Systematic Clean
- Standardise
- Sustain

Learn the techniques for eliminating the waste (time and product) caused by disorganisation and clutter. An MVP Business Solutions Manager can guide you through the steps – from preparation to implementation and then monitoring – that go into creating a 5S work environment in your own collision centre. Providing the correct resources, tools and equipment in an organised manner creates an efficient place for technicians to operate at peak efficiency, resulting in improved productivity, cycle-time and profitability.

*Available as part of PPG's comprehensive support package, the MVP Business Solutions program is aimed at helping customers to improve performance across the full spectrum of business activities.*
