

Facility Audit

Every collision centre owner wants to improve their business but where do you start? For well over a decade, the MVP Facility Audit has been providing the answers.

This detailed onsite assessment by an expert MVP Business Solutions Manager uses a systematic approach to analyse key areas of the business – management, panel and refinish departments. The result is a confidential and comprehensive report giving solid facts about what each department is doing well and not so well. This generates a set of ‘action points’ which highlight and prioritise the most important areas to be tackled first and the benefits to be gained by rectifying them, as well as a timeframe for completion and who is responsible for making it happen.

Because there is always room for improvement, the MVP Facility Audit is designed to be done on a regular basis. By accurately identifying the procedures and practices that can be implemented to improve productivity and efficiency, the MVP Facility Audit provides a roadmap for driving the business forward and your MVP Business Solutions Manager is there to support you every step of the way.

Available as part of PPG's comprehensive support package, the MVP Business Solutions program is aimed at helping customers to improve performance across the full spectrum of business activities.
