

Technical Training

Technical skills training gets results and the MVP Business Solutions team can prove it. Years of experience shows that upskilling technicians via PPG training brings substantial workshop savings in terms of labour time and repair cycle-time.

With a network of fully-equipped facilities across the region, PPG is Australasia's largest refinish training provider. Rather than one-size-fits-all, PPG programs are individually tailored to the needs of each repairer. With a clear insight into the challenges facing modern collision centres, highly skilled PPG Training Managers offer easy to understand courses, combining 'best practice' products, processes, equipment and techniques. Course content is continually updated as new technologies, processes and products emerge so even experienced technicians will learn something new.

Whether it's delivered at a PPG training facility or onsite in your workshop, this customised solution enhances staff knowledge, confidence and motivation which is a key to boosting productivity and profitability. Training from PPG professionals is one of the best investments you can make in the future of your business!

Available as part of PPG's comprehensive support package, the MVP Business Solutions program is aimed at helping customers to improve performance across the full spectrum of business activities.
