

Rapid Improvement Workshops

Got a frustrating workshop issue that is putting the brakes on productivity? You need an MVP Rapid Improvement Workshop! As the name suggests, it's specially designed to provide a rapid response to a challenging issue.

Run onsite by an MVP Business Solutions Manager, typically over one day, a Rapid Improvement Workshop is an intensive, structured technique for quickly and effectively getting to the core of an issue and developing a viable solution. Importantly, you and your shopfloor team are totally involved in the process. This includes analysing the issue, brainstorming strategies to resolve it and then going 'hands-on' to test run the new process to ensure it works and delivers the required benefits. Working closely with staff at the 'coalface' means decisions can be made rapidly and everyone is part of the resolution.

Another valuable advantage of a Rapid Improvement Workshop is that it helps to develop in-house skills. This enables your technicians to use learned techniques to tackle future challenging issue on their own or with the support of your MVP Business Solutions Manager.

Available as part of PPG's comprehensive support package, the MVP Business Solutions program is aimed at helping customers to improve performance across the full spectrum of business activities.
